THIS DISCLAIMER OF LIABILITY AND LIMITATION OF LIABILITY MAY NOT BE ALTERED EXCEPT BY AGREEMENT SIGNED BY THE OFFICERS OF THE MANUFACTURER AND SELLER.

### GUIDELINES FOR SELF-ADHERING HANGERS

**USE:** These hangers are designed to mechanically hold insulation material to various surfaces. It is very important for the user to determine the suitability of this product for each application. Discretion must be used in application, and we recommend that the user first perform a test application to satisfy himself of the desirability of using the product for the user's particular purpose.

**CAUTION:** The user is responsible for determining the suitability of the application. Hangers must be applied to a clean, dry, non-porous surface that is free of all oil, films, dust, rust, etc. Self-adhering hangers are not recommended for concrete or painted surfaces. It is important that they not be used where operating temperatures can exceed 150° F at the point of adhesion. Hangers should not be used on ceilings or roofs of metal buildings or any surface the reverse side of which may be exposed to heat concentration from sunlight, etc., direct or otherwise. Load per anchor should not exceed 3 lbs.

**APPLICATION:** Best results are obtained when ambient temperature is above 40° F at the time of application. Remove the release paper from the base plate and apply hanger to a suitable flat surface. A firm straight, forward pressure should be used. Do not twist. Due to the quick-tack nature of the adhesive, it is very important that the release paper not be removed until ready to apply the hanger. Insulation may be applied immediately after properly securing the hanger. Hangers should be stored at 75° F and 50% relative humidity. It is important that stock be rotated. Shelf life is estimated at 2 years if stored as recommended.
