Holding the World's Insulation in Place

## J HOOKS

J Hooks are used to secure insulation to wire mesh. They can be tack and arc welded, or just hooked onto the mesh. After the hook is attached, the insulation is installed over the longer portion and held with a self-locking washer.

### Specifications

Diameter:	10 ga (.135 dia) standard
	12 ga. (.106 dia) as special order

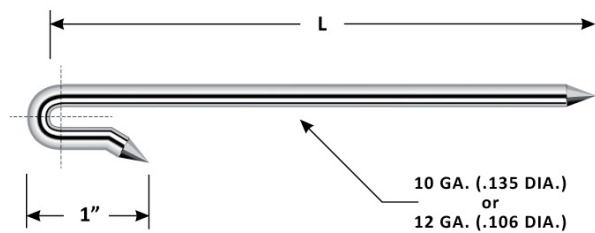

### Material

- Available in mild steel (galvanized) or Stainless Steel Type 302HQ

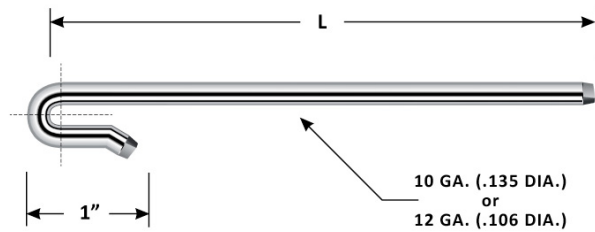

### Application

- Available with nail point or "blunt" end
- Used with self-locking washers

#### NAIL POINT

#### BLUNT END
