Holding the World's Insulation in Place

LACING ANCHORS

Lacing Anchors are used in the fabrication of insulation blankets or removable covers/pads. The nail is pressed through the insulation material, so the hook portion sits on the top edge and the nail is secured on the opposite side of the insulation with a washer. The two sides of the blanket can then be "laced" together by the hooks with tie wire.

Specifications

D	C	L
14 gauge (.080)	7/8"	2-1/2"
14 gauge (.080)	7/8"	4-1/2"
12 gauge (.106)	7/8"	2-1/2"
12 gauge (.106)	7/8"	4-1/2"

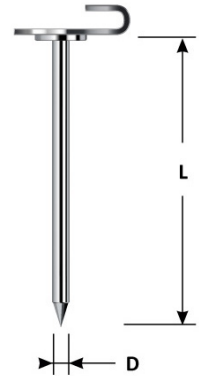

Standard lengths listed. Other lengths available on request.

Material

- Mild Steel (zinc plated) or Stainless Steel
- Available with 3/8" diameter top plate as special order

Application

- Self-locking washers available in a variety of sizes and configurations
- Domed caps can also be used to cover the tip of the nail
